

Bring crystal-clear audio to even the largest collaboration spaces

Lifesize® Digital MicPod™

In addition to a pro audio 48 kHz sampling rate, Lifesize Digital MicPod reduces ambient room noise and features beam-forming technology that automatically steers its three microphones toward the person speaking for greater voice pickup.

Touch-sensitive mute button and “Mute” and “In-Call” LED indicators round out the user-friendly features that make Lifesize Digital MicPod a clear-cut choice for organizations that need to extend the audio pickup range of Lifesize® Phone™ HD or Lifesize Phone 2nd Generation.

Lifesize Digital MicPod works only with Lifesize Phone HD or Lifesize Phone, 2nd Generation, via two Lifesize Link connectors.
